### **OATH/DECLARATION**

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

It does not properly state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The correct statement should be "I acknowledge the duty to disclose information which is material to patentability of this application in accordance with Title 37, Code of Federal Regulations Section 1.56."

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. W. Collard on November 16, 2007.

Claim 1 has been rewritten as follows:

--1. A method for joining an initial section of a non vertically orientated film tube which is wound up in a band-like manner on a reel with an end section of a second non vertically orientated film tube extending over subsequent processing stations in an at least partly band like manner comprising:

cutting the initial and end sections of the two film tubes to form longitudinally separate tabs in each of the films;

folding the separate tabs of the two film tubes out of the planes of the films;

moving the folded tabs of the initial and end sections above one another and back onto the plane of the films to overlap each other with the lower face of the tab on one film engaging the upper face of the tab on the other film; and

joining the overlapped tabs in a tension-proof way with each other. --

Claims 8 and 9, directed to the non-elected invention, have been cancelled.

The following is an examiner's statement of reasons for allowance: The prior art does not show the method of joining the initial and end sections of two film tubes which comprises cutting the two tubes to form longitudinally separate tabs in each of the sections of the tubes, folding the separated tabs out of the planes of the films, moving the folded tabs back over each other into the planes of the films so that the lower face of the tab of one film tube section is positioned to engage the upper face of the tab of the other film tube section and then joining the overlapped tab.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
